Tensioning Tools

Secure ties quickly and efficiently

A. Low-Cost Tensioning Tool is lightweight, pocket-sized tool constructed of high-impact engineering resin. Just squeeze handle until tie reaches desired tension, then twist tool to cut tie. Use with all cable ties except 06830-36 and -91.

B. Polycarbonate Tensioning Tool features dial-adjustable tension setting. Simply squeeze the handle to pull tie to a preset tension and cut.

C. Aluminum Tensioning Tool adjusts tension from light to very tight using a knob at base of this tool; tension knob features a lock to ensure repeatable tension, tie after tie. No twisting needed—tool cuts tie automatically when preset tension is reached. Shock-resistant tool absorbs all impact.
